Calmodulin-binding transcription factor shapes the male courtship song in *Drosophila*
Kosei Sato, Md. Tanveer Ahsan, Manabu Ote, Masayuki Koganezawa, Daisuke Yamamoto

*Drosophila melanogaster* male brain visualization
Image Credit: This image shows the male brain and VNC stained for croaker-GAL4 expression, representing Camta localization visualized with an anti-GFP antibody (green) and the monoclonal antibody nc82 (magenta), which labels all arborizations. Daisuke Yamamoto.
